In order to obviate a drift in the duration profile, there will be fixed duration bands for a few indices. If in a particular month the duration of any of these indices drifts beyond the mentioned range, rule-based intervention would be made.

These indices and their relevant duration bands are as follows:

Index	Fixed Macaulay Duration Range
CRISIL Ultra Short Term Debt Index	0.28 – 0.48

Index	Fixed Macaulay Duration Range
CRISIL Low Duration Debt Index	0.58 – 0.90
CRISIL Short Term Bond Fund Index	1.60 – 2.40
CRISIL Medium Term Debt Index	3.30 – 3.80
CRISIL Medium To Long Term Debt Index	4.60 - 6.30

Note : The Macaulay duration numbers for all indices are estimated on the date of advance notice (rollover) and comply to the above fixed range on that date.

Features and Methodology

CRISIL AAA/AA+/AA/AA- rated and Banking/ PSU Credit Indices

Features

- Total Return Index seeking to capture coupon and price returns of the underlying portfolio
- Index portfolio marked-to-market on a daily basis using CRISIL debt valuations

Maturity Buckets:

AAA/AA+/AA/AA- rated indices

1. Long Term: Securities with residual maturity greater than 5 years
2. Medium Term: Securities with residual maturity between 3 to 5 years
3. Short Term: Securities with residual maturity up to 3 years

For Banking/ PSU Indices

1. Short Term: Securities with residual maturity up to 3 years
2. Medium to Long Term: Securities with residual maturity greater than 3 years

Key Characteristics

- **Rich history:** CRISIL AAA rated bond indices have inception date of March 31, 2002. Thus the indices have been in existence for over a decade and have seen multiple interest rate cycles
- **Liquidity:** The indices seeks to capture the movement of a portfolio comprising liquid AAA/AA+/AA/AA- rated corporate bonds, thereby ensuring appropriate market representation
- **Replicability:** The indices constituents are valued on a daily basis. This lends the indices a realistic approach by having the valuations close to market levels.

Methodology

- Top 12* issuers subject to buffers are identified by using a consistent liquidity score based on the following parameters analysed for the previous one quarter:

- Volume traded: 70%
- No of days traded: 15%
- No of trades: 15%
- A buffer is the rank up to which an issuer which was a part of the index for the previous quarter but has a liquidity score lower than top n issuers (where n is maximum number of issuers that can be a part of index) in the current quarter would continue to be the part of the index. This means that even if the rank of a particular issuer deteriorates to the buffer rank it will not be sold from the index. A buffer of rank 15 would be used for all the indices having 12 securities, during issuer selection. Apart from applying buffers, the following conditions will always be met:
 - The issuers with Ranks 1 to 3 would compulsorily form a part of the index.
 - If an issuer is a part of top n issuers but ignored due to buffers for 3 consecutive quarters, the same will be considered if it appears in top n for the 4th quarter.

**Upto 12 Issuers will be selected*

- Only listed issuers shall be included in all CRISIL bond indices. An issuer will be considered to be listed if at least one security of such issuer is listed.
- Rating considered for a bond is the conservative rating of all the bonds for that particular issuer (except for SO rated bonds)
- The weights to the eligible bonds are allocated on the basis Amount outstanding of issuer
- Most liquid bond for each of the shortlisted issuers is selected
- Weight to each bond is subject to a cap of 10%. Excess weight is redistributed proportionately among other bonds
- The index constituents are valued on a daily basis using CRISIL Valuations
- Perpetual bonds, Floating rate bonds, Tax free bonds and bonds with single option (call/put) are excluded from the universe of bonds
- For Banking/ PSU indices Basel III compliant additional tier 1 bonds are included as a part of selection universe.
- For Banking/ PSU indices bonds with security level rating below AA will be excluded.
- For cases where there are less than 3 issuers in a particular index during any period, a fall-back criteria will be followed:
 - Carry forward the existing issuers if they meet the rating and maturity criteria (select based on amount outstanding to complete 3 issuers)
 - Select the issuer from primary data in the preceding month of the rebalancing with the maximum issue size in that month to complete the deficit to reach 3 issuers. If this is also not resulting in 3 issuers, keep on going back month at a time in primary to select the issuers till 3 issuers are found.
- The index is rebalanced on the 1st business day of every quarter.

CRISIL A rated Credit Indices

Features

- Base date for the Index: March 31, 2002
- Total Return Index seeking to capture coupon and price returns of the underlying portfolio
- Index portfolio marked-to-market on a daily basis using CRISIL debt valuations

Maturity Buckets:

- Short Term: Securities with residual maturity upto 3 years
- Medium to Long Term: Security with residual maturity greater than 3 years

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to market levels.

Methodology

- Issuers are selected based on primary market issuances
- Unique issuers for the portfolio of the base month (Month of Inception) are selected based on issuances during the prior one year. All issuers that fall within the eligibility criteria of maturity and rating during the period are identified to be a part of the index.
- Only listed issuers shall be included in all CRISIL bond indices. An issuer will be considered to be listed if at least one security of such issuer is listed.
- On an ongoing basis, the issuances of the previous month would be considered for addition of unique issuers in the existing portfolio
- For each issuer, the security that is most recently issued becomes a part of the index portfolio. These securities continue to be part of the index until
- It falls out of the eligibility criteria (rating and maturity) and is removed from the index
- It is replaced in case a new security of the same issuer is issued. In case more than one security of an issuer is issued on the same day, the one with the highest issuance size is selected.
- Weights to eligible securities will be allocated based on the amount of issuance.
- Weight to each bond is subject to a cap of 10%. Excess weight is redistributed proportionately among other bonds
- Rating considered for a bond is the conservative rating of all the bonds for that particular issuer (except for SO rated bonds)
- The index constituents are valued on a daily basis using CRISIL Valuations
- Perpetual bonds, Floating rate bonds, Tax free bonds and bonds with single option (call/put) are excluded from the universe of bonds
- The index is rebalanced on the 1st business day of every month.

Impact Cost & Rating Downgrade for Bond Indices

- At reconstitution, based on the liquidity classification of corporate bonds, an impact cost (5 - 20 bps) is incorporated to the incoming and outgoing securities based on the liquidity classification of the issuer.
- The issuers/securities which have been downgraded and are part of the index, shall be removed from the index with at least one month of notice.
- The table below summarizes the number of months the issuer/security will remain in the index post various events:

Event for Exclusion	No of months to be retained in the index
Rating downgrade	1

Examples:

- Any issuer that undergoes a rating downgrade in the first two months of a quarter (outside the rating criteria of the index) while it is a part of an index, will be removed from the index at the end of the quarter. However, if the downgrade happens in the third month of the quarter, the security will remain in the index for an additional month.

For instance, if there is a rating downgrade in January or February, it will be removed at the end of March, whereas if there is a rating downgrade in March, it will be removed at the end of April. However, such an issuer will be considered to be a part of the index that represents the rating bucket to which it is downgraded in the April rebalancing (next quarter rebalancing)
- In case of rating upgrade mid quarter, the issuer is removed from the index without any replacement by the end of the month in which it is identified as rating upgrade. The weight of the remaining securities is recalculated accordingly.
- In case of quarter rebalancing, after rollover notice issued to the market, if a new issuer which is not a part of previous rebalancing is downgraded beyond the criteria of the index, then the same is removed immediately with the replacement of the next best liquid issuer. If any issuer is upgraded beyond the criteria of the index post the issuance of the rollover notice then the same is removed immediately with the replacement of the next best liquid issuer.

CRISIL Gilt Indices

Features and Characteristics

- Total Return Index seeking to capture coupon and price returns of the underlying portfolio
- Index constituents valued on a daily basis using CRISIL Gilt Valuation
- Index weights rebalanced on the 1st business day of every month

Key Characteristics

- **Rich history:** The indices have been in existence over a decade witnessing multiple interest rate cycles and has stood the test of time
- **Liquidity:** The indices seeks to capture the movement in a portfolio consisting of most liquid government securities by using appropriate market representation
- **Replicability:** The indices constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to market levels.

Methodology

- Trading pattern of government securities analysed during previous quarter with security rebalancing on monthly basis.
- Consistent Liquidity Scores assigned to each security on the basis of:
 - Volumes traded (70%)
 - Days Traded (15%)
 - Number of Trades (15%)
- Top n securities (n defined in the table below) on the basis of Consistent Liquidity Score eligible to be part of the index subject to buffers

Index	No of securities (n)	Residual maturity criteria
CRISIL Long Term Gilt Index	8	Greater than 10 years
CRISIL Medium Term Gilt Index	8	Greater than 5 to and up to 10 year
CRISIL Short Term Gilt Index	8	Up to 5 years
CRISIL Composite Gilt Index	9	Top 3 securities each from long, medium and short term bucket
CRISIL Dynamic Gilt Index	12	NA

- A buffer is the rank up to which a security which was a part of the index for the previous month but has a liquidity score lower than top n securities in the current month would continue to be the part of the index. This means that even if the rank of a particular security deteriorates to the buffer rank it will not be sold from the index.

The buffers to be used for each index would be as follows:

Index	No of securities (n)	Buffer
CRISIL Long Term Gilt Index	8	11
CRISIL Medium Term Gilt Index	8	11
CRISIL Short Term Gilt Index	8	11
CRISIL Composite Gilt Index	3 each from long, medium and short term bucket	6 each from long, medium and short term bucket

- Apart from applying buffers, the following conditions will always be met:
 - The security with Rank 1 would compulsorily form a part of the index.
 - If a security is a part of top n securities but ignored due to buffers for 3 consecutive months, the same will be considered if it appears in top n for the 4th month.
 - The 10 year benchmark government security forming a part of CRISIL 10 Year Gilt Index will automatically replace the least liquid security and form a part (if not already a part) of all the eligible liquidity based gilt indices.

- Weights to eligible securities will be based on Amount outstanding
- Surrogate bonds (namely Food Corporation of India bonds, Oil bonds, Fertiliser bonds and UTI Special Bonds) and Floating rate bonds kept out of the purview of the selection process since these are quasi government bonds
- At reconstitution, an impact cost of 3 bps is incorporated to incoming and outgoing government securities.

CRISIL Broad Based Gilt Indices

Features and Characteristics

- Total Return Index seeking to capture coupon and price returns of the underlying portfolio
- Index constituents valued on a daily basis using CRISIL Gilt Valuation
- Index weights rebalanced on the 1st business day of every month

- **Rich history:** The indices have been in existence over a decade witnessing multiple interest rate cycles and has stood the test of time
- **Liquidity:** The indices seeks to capture the movement in a portfolio consisting of most liquid government securities by using appropriate market representation
- **Replicability:** The indices constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to market levels.

Index	Residual maturity criteria

CRISIL Broad Based Short Term Gilt Index	Up to 5 years

- Weights to eligible securities will be based on Amount outstanding
- Surrogate bonds (namely Food Corporation of India bonds, Oil bonds, Fertiliser bonds and UTI Special Bonds) and Floating rate bonds kept out of the purview of the selection process since these are quasi government bonds

Weighing Approach/Methodology

- Monthly floating weight approach is being used for securities/asset classes. (The approach will be used for all standard and customised indices unless otherwise stated specifically in the customized requirement)

- Weights shall move with the prices of underlying securities/asset classes and shall be reset monthly. (for hybrid indices the asset allocation to debt and equity will also float on monthly basis based on the asset class performance and will be reset to the stated asset allocation at the month end rebalancing date)
- Other than the CRISIL 10 Year Gilt Index & CRISIL Liquid Fund Index, the cash generated due to coupon payment or part redemption will be carried in all the indices and reinvested along with the monthly reset date of weights as this would mean no transactions between rebalancing periods and would improve replicability.

- **Replicability:** The indices constituents are valued on a daily basis. This lends the index a realistic approach by having valuations close to market levels.

Methodology

- The indices are rebalanced on a fortnightly basis using primary market issuances, secondary market trades and holdings for A1+ rated CDs
- Based on the issuance data of the previous fortnight, a maximum of 10 issuers are shortlisted based on their issuance amount in the data period.
- For each of the shortlisted issuers, the security (except for floating rate/mibor link securities) with the highest residual maturity is selected.
- In case, the number of securities shortlisted using primary issuance data falls short of 10, remaining issuers are identified based on the secondary market trades data during the data period.
- Based on the secondary traded data of the previous fortnight, the remaining number of issuers are shortlisted based on their traded volume in the data period.
- For each of the shortlisted issuers, the security with higher residual maturity is selected.
- In case, the number of securities shortlisted using primary issuance and secondary trades data falls short of 10, the remaining issuers are identified based on the CD holdings by various entities
- Issuers are shortlisted based on higher residual maturity
- In case the number of securities shortlisted using primary issuance, secondary trades and holdings data falls short of 10:
- Remaining issuers are identified from the existing portfolio with a flexible maturity band of -7/+15 (for 1 month CD index: no relaxation, for 2 month CD index: -4/+15, and for 3 month CD index: -6/+15) days around respective tenor.

In case the number of securities shortlisted using primary, secondary trades and holdings + outstanding data in phase 1 falls short of minimum no. of sectors or issuers in order to meet cap requirements, then the remaining issuers are identified from the existing portfolio (except for 1 Month CP Index). Sectors and issuers are shortlisted based on higher residual maturity.
- For each sector, top issuers (up to 3) in each sector will be identified. The identification of issuers will be based on the size of issuance (in case of primary market data), size of traded volume (in case of secondary market data) and higher residual maturity (in case of MF holdings data). One security (except for floating

rate/mibor link securities) of each issuer with the highest maturity will be selected in the index.

- Only listed issuers shall be included in the index. An issuer will be considered to be listed if at least one security of such issuer is listed.
- The sector weights would be in close compliance with the restrictions prescribed by the regulator. The security inside each sector will be equally weighted.
- In Phase 1, if due to issuer weight cap requirements (10%), the index falls short of 100% weight, sectors in addition to 6 sectors already selected, will be selected in phase 2 from primary, secondary, and holdings data. Only 1 issuer per additional sector will be selected.
- If sufficient sectors/issuers are not available, then the sector/issuers from the previous rebalancing period will be carried forward.
- If no issuers could be identified from the above steps, indicative yield for A1+ rated CPs of appropriate residual maturities would be used as input for valuation

CRISIL-IBX Gilt Index – April 2026

CRISIL-IBX Gilt Index – April 2026 seeks to track the performance of gilt issuers with total amount outstanding greater than Rs. 25,000 crores maturing between 1st November 2025 to 30th April 2026. The index shall mature on 30th April 2026.

Asset Allocation

- **Government Bonds: 100%**

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- The index uses a buy and hold strategy wherein the portfolio of G-sec is held till maturity unless they become ineligible
- Index portfolio marked-to-market on a daily basis using CRISIL Gilt and T-Bills valuations
- Inception Date of Index: 22nd September 2022.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels

Methodology

Security Selection:

- Only fixed coupon bearing plain vanilla G-Sec will only be eligible for the index
- All eligible Securities shall be selected on the basis of Amount Outstanding as evaluated during the inception date of the index.
- Minimum Amount Outstanding should be Rs. 25000 crore.

Weighing Approach:

- Weights to individual securities will be calculated in the ratio of amount outstanding (30% weightage) and liquidity score (70% weightage). The weights may vary on account of relative price movements
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter
- Weights will be reset during the annual rebalancing

Rebalancing and review:

- The securities shall be rebalanced every 6 months and the relative weights of the Government securities will change due to price movement and will be reset during the half-yearly rebalancing.
- Eligible securities will be added on a half-yearly basis and weights will be redistributed based on ratio of amount outstanding (30% weightage) and liquidity score (70% weightage).
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights.
- As the index includes securities that shall mature during the 6 month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach –
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding government security issued by the same issuer and maturing on or just before the index maturity date.
 - In case a replacement in the form of another outstanding government security cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights
 - In case due to any reason, it is not possible to meet the requirements stated in point a and b above, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The effective date of the above rebalancing shall be first working day of the month or the quarter.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on a unplanned market off, will mature on the next working day.'

Index Computation Formula

Calculation formulae:

- Today's Index value = One day prior to rebalancing day Index value* (1 + Month to date index return)
- **For indices having underlying securities as constituent: Month to date index return = $\sum W_i \times R_i$**
 - ❖ Where W_i is the weight of security at the beginning of rebalancing period

- ❖ $R_i = \{(\text{Today's gross price of security } i + \text{Coupon cash flow received in security } i \text{ till date from the beginning of rebalancing period} + \text{redemption cash flow received in security } i \text{ till date from the beginning of rebalancing period}) / \text{Beginning of the rebalancing period Gross price of security } i\} - 1$
- **For composite indices: Month to date index return = $\sum W_i \times R_i$**
 - ❖ Where W_i is the weight of sub index at the beginning of rebalancing period
 - ❖ $R_i = \{(\text{Today's index value of sub index } i) / \text{Beginning of the period index values of sub index } i\} - 1$
- For CRISIL Liquid Fund Index
 - ❖ Redemption cash flow received in security i till date from the beginning of rebalancing period = $(\text{Today's index value of CRISIL Overnight Fund AI Index} / \text{Index value of CRISIL Overnight Fund AI Index on the date of cash flow}) * \text{Redemption cash flow received}$

Index Restatement Policy

CRISIL at its discretion may choose to recalculate index values in the event one of the following issues has occurred:

1. Change in valuation levels/data - change in the valuation of underlying constituent will lead to change in the index values and hence the same need to be restated. Similarly change in the data provided by vendor for indices which use these data for directly computing index values or rebalance constituents may lead to change in index values.
2. Incorrect calculation due to manual/process error – The incorrect calculation may be due to manual error by the analyst for indices or process error. Such errors may lead to incorrect index values which may be restated.
3. Incorrect application of methodology – The index computation approach if applied incorrectly may lead to different constituents/weights than actual case and leading to incorrect index values.

All above changes that impact the index values may be recomputed through the decision made by the criteria committee. The criteria committee will take in to consideration the materiality of the impact or disruption resulting from the potential recalculation is considered when making any such decision. In the event CRISIL chooses to recalculate an index, it shall do so within a reasonable time frame following the detection and review of the issue. If it is determined that an index will be recalculated, the following steps will be taken upon completion of the recalculation:

- All impacted delivery files are regenerated and sent to all clients
- Clients using the data are informed via email and/or CRISIL webpage.

CRISIL Indices – Cessation Policy

A periodic review of criteria is carried out to ensure that the indices to ensure the representativeness and relevance of the benchmarks. Accordingly CRISIL may decide to discontinue creation of an index on account of following reasons:

- Non availability of underlying instruments that may be eligible for the index
- Regulatory policies
- CRISIL's internal assessment of index appropriateness
- Commercial non viability
- Data unavailability due to vendor issues

The process to be followed before cessation of benchmark is stated below:

- During the annual review of indices, the commercial viability of the indices may be evaluated. Additionally, if required such review may be conducted in the interim period as well for any specific index based on market feedback and other conditions.
- During any of such review, reason for the benchmark cessation shall be determined and presented before the criteria committee. Following pointers shall be taken into consideration during criteria committee discussion:
 - Reason for cessation
 - Availability of the alternatives
 - Feedback of the index subscribers
- A reasonable advanced notice shall be put up on CRISIL website before the benchmark cessation effective date. The extent of the notice could vary depending on the subscriber feedback, basis the criteria committee discretion or viability of continuing the benchmark during the advanced notice period. Less than 1 month notice shall be given in following circumstances:
 - Unavailability of underlying instruments that may be eligible for the index and inability to create an alternative benchmark to serve the objective
 - Breach of contract by the underlying data provider and inability to ascertain an alternative data source

Managing Uncertain Events

Certain external events can cause disruption with regards to index construction leading to a delay in our daily dissemination activities or rebalancing related activities. We have listed below the probable disruptions and the action plan to be carried out in case of such disruptions occurring on account of uncertain events.

1. Delay in the daily dissemination of indices:- The chosen course of action of CRISIL Indices will depend on its analysis of the circumstances pertaining at the time and the respective source of input which is unavailable. CRISIL

Indices as a process has a well-defined BCP in place that is tested periodically. CRISIL has also accessed the BCP of all the data vendors that contribute to index creation.

2. Delay in Rebalancing activities due to unavailability of traded/issuance data from vendor:- Chances of a delay in rebalancing activities are very rare mainly because there is a buffer time between the rebalancing effective dates and the data receiving dates and hence, such gap or buffer, may avoid any kind of disruptions occurring on account of uncertain events. However in case of such delays, call will be taken based on criteria committee members' discussion and analysis of the situation to decide the best course of action.

Market Feedback

It is our endeavour to ensure that all CRISIL indices are relevant for the market participants. In order to ensure this, ongoing feedback is sought from the users on the index construction methodology. The feedback forms a key input for criteria review committee discussions.

Limitation

Fixed income instruments are thinly traded and the trade-off between liquidity and representation needs to be addressed. Also on account of similar reason, pricing of the underlying securities of the index is not always based on observed prices in the market.

Criteria Review and New Product Launch

In our endeavour to keep the indices representative and replicable, CRISIL Indices reviews the criteria for index construction on an annual & a semi-annual basis. In the annual criteria review the primary agenda is to revisit at the weights to sub-indices in the composite indices. These are arrived at keeping in mind the issuance trends, outstanding numbers, and other constraints defined by regulation. In the semi-annual criteria review only the relative weights of money market instruments are reviewed and modified. Any other changes in index criteria based on market developments, structural changes in the markets or market feedback are reviewed on an ongoing basis. Any exercise of expert judgment is done through criteria committee and the same is recorded in the criteria committee minutes, notes or emails. All the changes to the criteria are communicated in advance on CRISIL Indices webpage (<https://www.crisil.com/en/home/what-we-do/financial-products/indices.html>).

All decisions with respect to the launch of new indices and criteria modifications/ cessation of existing indices are taken by the Criteria Committee. The role of Criteria Committee and criteria for selection of members are predefined and reviewed periodically.

The criteria committee while taking the criteria related decisions take the following factors into consideration as and when relevant:

- Market statistics:
 - Issuance trends
 - Liquidity trends
 - Portfolio holding patterns
- Regulatory requirements for the relevant industry
- Market feedback wherever necessary
- Index construction principles

Dissemination of Indices

All CRISIL standard & customised index values and constituent details are to be disseminated to the clients on T+0/T+1 basis via email, SFTP uploads, API setup and web upload.

The timeline for deliverables are as follows:

- The index values are sent on T+0 basis (same working day) before 11:59 pm.
- Constituent Details are sent on a T+1 basis (next working day) before 11:59 pm.
- In case of debt market holidays, index values are sent before 05:00 pm of the next working day and constituent details before 11:59 pm of the next working day.
- Index values for CRISIL Overnight Fund AI Index and CRISIL Liquid Fund Index for debt market holidays are sent in advance i.e. on the working day before the debt market off. Eg. If 2nd Jan 2021 is a market off then index values are sent on 1st Jan 2021.

We provide insights, opinion, analysis, and data on the Indian economy, industry, capital markets, and companies. We also conduct executive training programs, predominantly in the area of credit and risk management. We are India's one of the most credible providers of economy and industry research. Our analysis is supported by inputs from our large network of sources, including industry experts, industry associations, and trade channels. We play a key role in India's fixed income markets, being the largest provider of valuation of fixed income securities to the mutual fund, insurance, and banking sector in the country. We are also a prominent provider of debt and hybrid indices to India's mutual fund and life insurance industries as benchmarks for performance assessment.

CRISIL Research also undertakes Equity and Debt valuation, publishes Mutual Fund Ranking for mutual fund schemes (across equity, debt, and hybrid asset classes) and provides Portfolio Analytics for Institutional Investors, which involves deep analysis of portfolio for corporates, pension funds, and provident funds at an asset class level. Our platform for wealth managers, Alphatrax, offers in-depth analysis of performance and portfolio-based attributes for diverse asset classes. It also enables investors to assess industry and company level risks based on CRISIL's proprietary models. We also provide Equity Support services to the domestic market intermediaries that use our research reports to assist their clients in making investment decisions in relation to listed or to be listed securities in India.

Quantix, our integrated data and analytics platform, finds use in diverse functions across the financial sector, corporates, and consulting firms including business strategy, deal/loan origination, credit underwriting, risk monitoring, and treasury/investment management.

Our Company reports (that combine select financial and non-financial data, analytics from our proprietary risk models, and commentary on company's financial performance) are used by large commercial banks and financial institutions as part of their credit/risk management process.

Our SME Performance Gradings, used by lenders, assess creditworthiness of SME enterprises relative to the peers leveraging our proprietary grading model. The framework includes assessment of entity-level financial and operating performance, as well as industry-level drivers.

Our defining trait is the ability to convert information and data into expert judgments and analytics with utmost objectivity. We leverage our deep understanding of the macro-economy and our extensive sector coverage to provide unique insights on micro-macro and cross-sectoral linkages.

Our talent pool comprises of economists, sector experts, company analysts and information management specialists.
