Gilt indices

The yield on the 10-year benchmark government security (G-sec; 7.10% CGL 2034) closed August at 6.86%, down 6 basis points (bps) from July-end.

The month started with bond yields softening following the Reserve Bank of India’s (RBI) notification about exclusion of new issuance in 14-year and 30-year securities from full accessible route (FAR) for investments by non-residents in G-secs. As the month progressed, amid weaker-than-expected US non-farm payrolls data and fear of US recession rising, US Treasury yields fell sharply, followed by the reduction in Indian yields. The fall in overnight index swap (OIS) rates and anticipation of stance change in the RBI’s Monetary Policy Committee (MPC) meeting kept the momentum upbeat. However, the MPC’s final decision of status quo did not lend fresh direction, dampening market sentiment. Domestic bond yields hardened, tracking a surge in US Treasury yields after the jobless claims data came in lower than expected.
